Welcome to the Greatest Automotive Supply Website in Asia!

Feature Products

PREMIER Automotive Supply now offer a new generation more efficient highly reliable wiper blade, the all new Frameless Wiper Blade. The frameless wiper blade utilises aerodynamics and acoustics which allow the blade to glide through. The frameless wiper blades does not have any metal structure, therefore there are no problems with freezing, noise and vibrations, gliding over the windshield (thus not generating any turbulence) which are problems found in standard blades.

Frameless wiper blades are found on high end Mercedes, BMW and other luxury cars, but you can have the same wiper blade technology on your car at a fraction of the cost.

Frameless wiper blades are fitted with a new style fastening mechanism with the a quick clip adaptor, this ensures the frameless wiper blades hook on easily to your standard wiper arms.

- These blades provide approx. 30% increase in the life compared to standard wiper blades.
- Infinite number of pressure contact points ensures a smear free clean across the windscreen.
- Even pressure across the whole wiper blade ensuring a high quality wipe with improved visibility.
- Flat aerodynamic design which reduces noise and wind lift (at high speeds).
- Joint less structure which allows the
